THE PROBLEM

COST INTENSIVE PROCESSES

Spending countless resources monitoring all the moving pieces along their supply chains can be an extremely costly and complex task.

DELIVERY DELAYS

Delivery delays slow down your company's operations which can be a huge hindrance towards improving supply chain operations.

OBSOLETE MAPPING TECHNOLOGIES

Complex, outdated mapping technologies not only take up most of your engineering team's time but also struggles to keep data real-time.

THE SOLUTION

MONITOR ASSETS ANYTIME, ANYWHERE

The solution can precisely locate and manage assets anywhere in the world from one centralized, real-time map.

TIMELY DELIVERIES

Leverage map-powered tools that help ensure materials and products arrive where they need to be in a timely manner.

ADVANCED ROUTING ALGORITHMS

Get access to a visual display of your fleets, constantly updated in real time with Google Maps. Access to-the-minute traffic information and preview streets to help drivers choose the most efficient routes.

INVENT YOUR DIGITAL FUTURE

We provide digital consulting services to help our customers understand and respond to the digital revolution. We do this by being your strategic thought partner, develop innovative solutions together and bring our deep expertise in technology, design thinking and agile implementation.
